

Get ready!

- Before you read the passage, talk about these questions.
 - 1 How important is the beef industry in your country?
 - 2 What type of meat is most popular in your country?

Reading

- Read the magazine article. Then, mark the following statements as true (T) or false (F).
 - 1 _ Soy-fed cattle grow faster than grass-fed cattle.
 - 2 __ Grass-fed herds produce higher grade beef.
 - 3 __ Grass-fed cattle do not eat in feedlots.

Vocabulary

(3) Match the words (1-8) with the definitions (A-H).

1 _ rancher

5 _ feed ration

2 _ grass-fed

6 _ processing facility

3 _ grade

7 _ grain finishing

4 _ cattle

8 _ feed conversion efficiency

- A a selected amount of food given to an animal
- B a place where animals are butchered
- C cows and bulls
- D a rating of the quality of beef
- E a measurement of how animals convert feed into mass
- F primarily eating grass from a pasture
- G a farmer who raises livestock
- H feeding cattle grain to raise weight before slaughter

is raising grass-fed cattle the way to go?

Grass-fed beef is in high demand. Many consumers say it tastes better than grain-fed beef. And they're willing to pay more for it.

The down side of grass-fed beef is the cost. Grasses have a lower feed conversion efficiency than com or soy. Cattle in pastures are also less likely to receive growth hormones. Thus, it takes longer for them to gain mass than their corn or soy fed counterparts. Furthermore, they do not receive antibiotics and can get sick more easily. Finally, com-fed herds often produce higher grades of beef.

However, there are methods to counteract those shortcomings. Some grass-fed cattle forage in pastures for the first few years of life. Before shipping them to a processing facility, ranchers send them to a feedlot for grain finishing. For approximately six months they receive special feed rations to bring them up to market weight rapidly.

> Fill in the blanks with the correct words and phrases from the word bank.

Wordenk growth hormones market weight beef

	marries 5
1	The cattle in theare bigger than those in the pasture.
2	is one of the
_	most popular sources of food for humans.
3	Grass-fed cattle take longer to achieve
4	Most cattle receive
	to keep them free of disease.
5	help cattle gro
	more quickly.
6	Disease can spread very quic

through a _____of co

Listen and read the magazine article again. How can farmers get around the problems related to grass-fed beef?

Listening

- Listen to a conversation between a rancher and her assistant. Choose the correct answers.
 - 1 What is the conversation mainly about?
 - A a drop in beef prices
 - B a mistake with antibiotics
 - C isn increase in cattle weight
 - D a change in cattle raising methods
 - 2 Why does the man oppose the woman's suggestions?
 - A. The ranch could lose money
 - B. The grass-fed trend is ending.
 - C. The cattle don't need antibiotics.
 - D. The cattle worlt reach market weight.
 - Listen again and complete the conversation.

reach market weight.

Rancher: I understand that It'll take longer and It'll

cost more.

Assistant: I hope you'll 3

Rancher: Well, 4

I'd like to stop giving them antibiotics and growth hormones, as well.

Basistant: That could be a 5 ...

We can also charge a lot

more for grass-fed, hormone-free beef.

Speaking

With a partner, act out the roles below based on Task 7. Then, switch roles.

USE LANGUAGE SUCH AS:

Are you suggesting we switch to ...
I don't think that's a good idea.
We can charge a lot more for ...

Student A: You are a rancher. Talk to Student B about:

- · grass-fed cattle
- growth hormones
- · costs and prices

Student B: You are an assistant to a rancher. Answer Student A's questions.

Writing

Use the conversation from Task 8 to fill out the rancher's memo. Include the reasons, costs and benefits of switching to grass-fed beef.

Journal of Livestock Production

Volume, 12 Issue 4, Spring 2011 Effective Use of Space in Swine Farming

Dr. Carol Braun and Dr. Charles Pierce

Many swine farms do not provide optimal space arrangements (Turner 2009). We studied twenty sow farms to learn about the best space arrangements in use today. Below are the findings from our research.

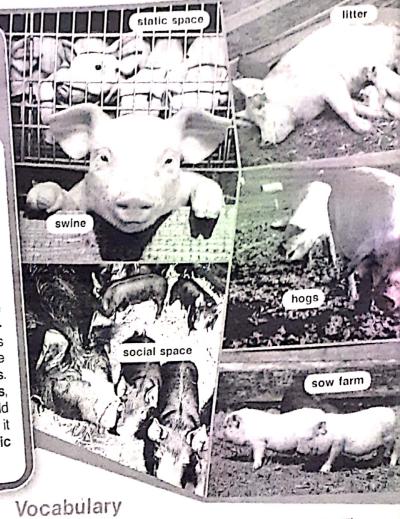

The space requirements are different the type of on Nevertheless, it appears important to provide more than the minimally required static space. Otherwise, hogs tend to be sicker and less productive. In farrow-tofinish farms, providing social space is advisable. When sows have adequate social space they produce healthier litters. In the case of farrow-to-nursery farms, providing social space does not add additional value. Therefore, we found that it is sufficient to provide adequate dynamic space.

- Before you read the passage, talk about these questions.
 - 1 Is the swine industry large in your country?
 - 2 What are the challenges of swine farming?

Reading

- Read the page from an agricultural industry journal. Then, mark the following statements as true (T) or false (F).
 - 1 _ Providing minimal static space leads to healthier hogs.
 - 2 __ Social space is recommended in farrow-to-finish farms.
 - 3 _ Farrow-to-nursery farms only need dynamic space.

Match the words (1-6) with the definitions (A-F).

4 _ dynamic space

2 _ sow farm

5 _ farrow-to-finish farm

3 _ litter

6 _ farrow-to-nursery farm

- A a group of baby pigs
- B a farm that raises female pigs
- C enough space for an animal to move
- D a farm that raises pigs to market weight
- E a pig that has achieved market weight
- F a farm that raises pigs until they are weaned
- Write a word that is similar in meaning to the underlined part.
 - 1 The female pig just had another litter. ____
 - 2 Larger pens provide space that allows animals to interact _ O C _ _ _ s _ _ c _ with one another.
 - 3 The amount of space required to contain an animal's body is not enough; the pig needs room to move.

_p__e

4 Raising pigs and related animals is difficult. _ w _ _ _

Listen and read the page from an agricultural industry journal again. Why is it better to provide more space for hogs?	Speaking With a partner, act out the roles below based on Task 7. Then, switch roles.
